Exel[®] Supermop with silver ions

A highly absorbent socket mop made with silver ion technology for extra hygienic and effective floor cleaning.

The Exel Supermop is a more hygienic, faster drying alternative to traditional cotton mops, and is ideal for small to medium floor areas.

It features long, thick strands of non-woven fabric that contains an antibacterial silver ion treatment. This means that once bacteria is picked up by the mop the silver ions prevent bacterial growth and enables a longer life of the product.

The Supermop fits the popular Exel handle and also the Abbey handle, which are sold separately. The mop is colour coded and machine washable to 60 degrees.

Key features & benefits

Anti-bacterial

Highly absorbent

Use wet or damp

Washable

- Prevents bacteria growth once on the mop.
- Highly absorbent.
- Cost effective.
- Colour coded socket.
- Fits both Exel and Abbey handles.
