Non-Sterile Disposable Face Masks

Single use, non-sterile, disposable face masks provide protection by creating a barrier from infectious agents, such as germs, potentially contaminated liquids and particles, and more.

Conforms to the following accreditation:

ISO90000
ISO14001
EN14683:2019

Please note the packaging pictured above may be subject to change.

To enquire about more information, please call the First Stop office on 01202 827666.

Each mask features single pleats, nylon and spandex ear loops and a flexible upper iron nose piece that contours to the face and nose for added protection.

Masks are blue in color and come in boxes of 50. Additional specifications:

- 99.8% Bacterial Filtration Efficiency (BFE)
- 98% Sub-Micron Particle Filtration Efficiency (PFE)
- 88mmHg Fluid Resistance
- BFE99 Filter (Melt Blown Polypropylene -MBPP)
- High-quality, 3-ply body materials
