KITCHENWARE

1975

The Bonzer® Lightgrip Portioner was developed and is now seen in a variety of establishments across the globe to aid menu consistency, improve profits and reduce waste. The portioning trend will continue to grow as diets and foods change.

BONZER® CAN OPENERS

EAZICLEAN RANGE

Bonzer® benchtop Can Openers have been manufactured in England for 85 years to the same high standards that went into design of our first model in the 1930's. Bonzer® Can Openers are built to last and survive the harsh working environment of commercial kitchens and come with a 3 year warranty as standard (excludes Classic models that has 1 year).

Patented removable parts on the Bonzer® Black range offer a unique and simple way to clean those hard to reach parts. You save up to 10 minutes cleaning time by removing the obstructing parts beforehand. All Bonzer® NSF Can Openers have stainless steel blades meaning the complete blade carrier unit is dishwasher safe.

The range has been classified according to the number of cans each model is designed to open on a daily basis: the EZ-20 for up to 20 cans a day, the EZ-40 for up to 40 cans a day, the EZ-60 for up to 60 cans a day and the EZ-Titan for more than 60. The models are identified by colour coded collars for easy recognition.

MADE IN THE UK

Bonzer® Can Openers are lovingly made in the UK at Mitchell & Cooper's factory in East Sussex.

NSF CERTIFIED

All Bonzer® Can Openers are certified Hygienic by NSF (excluding Classic Models).

CASE STUDY

BONZER® LEADS TO SUCCESSFUL CATERING OPERATION AT THE ROYAL BOURNEMOUTH HOSPITAL

"We open over 1300 cans every month so if the can opener develops a problem, we develop a problem with the catering. Our previous opener would sometimes require the blade to be changed after every 40 cans, that's almost every day. More concerning was that if the user put the blade on slightly skewed, shards of metal could also find their way into the food. I knew we had to do something, and fast."

"When I purchase equipment it is about getting the right tool for the right job. The Bonzer® Titan is exactly that. It has a quick release blade system, meaning that changing the blade it is a fast and simple.

The entire open process is quicker and cuts down on labour. With our last opener it could take fourteen turns to open an A10 can, with the Bonzer® Titan it takes just seven thanks to its larger handle and 40mm cog wheel. On 1300 cans this equates to serious time and labour savings."

"The quick release system allows us to place the entire system in the dishwasher at the end of each day to eradicate any problem before it has begun."

*Catering Manager, Terry Reeve,
The Royal Bournemouth Hospital*

PATENTED 'QUICK RELEASE BLADE'

The blade can be removed in a matter of seconds for easy cleaning and changing of parts. All Bonzer® Can Openers feature an easy to remove blade carrier - a feature unique to Bonzer®.

EASY TO CLEAN

Designed to be easily taken apart for thorough cleaning. Keep Environmental Health Officers happy with a Bonzer® Eazi-Clean model.

Pull handle back to release.

Remove the trigger while pulling back handle.

Wash trigger thoroughly between usage.

Replace the trigger while pulling back handle.

UP TO 10

BONZER® CLASSIC R CAN OPENER

For over 30 years this model has been the dependable workhorse of the kitchen. With strong and heavy construction, the Classic R combines incredible reliability and durability.

SPARES

KEEP YOUR BONZER CAN OPENER WORKING EFFICIENTLY WITH REPLACEMENT BLADES AND WHEELS.

Over time can opener wheels and blades will wear out. Replacing them will give a new more efficient feel to the can opener.

Bonzer blades are available in both hardened steel or stainless steel variations.

The wheels are available in 25mm for Classic R and EZ20 models or 40mm for EZ-40, EZ-60 and Titan models.

Replacement parts list available on page 152

CHEF'S CHOICE DIAMOND HONE ANGLE SELECT

It's the world's most versatile sharpener, engineered to apply incredibly sharp edges on all your Euro/American and Asian style knives (15° and 20° class knives).

- ✓ 3-Stage, AngleSelect® system for optimum versatility in providing perfect edges for each type of knife: kitchen, sports, pocket and serrated knives.
- ✓ 100% diamond abrasives for sharpening and honing
- ✓ Patented flexible stropping/polishing disks for a upper sharp, microscopically flawless polished edge

CHEF'S CHOICE DIAMOND HONE®, ANGLE SELECT SHARPENER

Scan for
stock
availability

Engineered to put a razor sharp edge on all quality knives! With this one sharpening system, you can sharpen both 20 degree and 15 degree class knives. This patented advanced technology electric sharpener can restore and recreate both, a 20 degree edge for traditional European and American style knives and a 15 degree edge for Asian style knives and contemporary European/American style knives.

The Chef'sChoice® Model 1520 will quickly and easily sharpen virtually all quality cutlery including American, European or Asian style household knives; fine edge or serrated blades; Santoku and traditional Japanese style single- bevel edges including the thicker Deba style blades; as well as sports knives and pocket knives.

Better Than Factory Edges: The Model 1520 will apply a better than factory, original edge geometry on virtually all cutlery with just one versatile sharpener.

12652-01 | 15° and 20° blades | Diamond Abrasives

COMMERCIAL 2100 DIAMOND HONE® ELECTRIC SHARPENER

Scan for product videos

The Chef'sChoice 2100 Commercial Sharpener is incredibly fast—at least two- to three-times faster than other commercial sharpeners. It sharpens the entire blade length of kitchen knives from the smallest paring knife to the largest chef's knife and cleaver in seconds. Built-in precision angle guides assure the correct sharpening angle and pressure and eliminate guesswork making it easier to use than any other sharpener.

In addition, the unit's entire sharpening module, including abrasives and guides, can be removed quickly and easily for cleaning and sanitizing at the sink or in a commercial dishwasher: a crucial capability for today's safety-conscious food service kitchen. The Model 2100 features a built-in "dresser" that keeps the polishing disks clean and glaze-free.

This rugged high-performance sharpener has been developed specifically for heavy-duty commercial kitchen use in restaurants, hotels, food service establishments, clubs and grocery chains. It is extremely cost-effective because it sharpens quickly, creates a longer-lasting edge (thus extending the time between resharpenings) and helps prolong the life of quality knives.

12653-01 | Dishwasher Safe Module | Diamond Abrasives

CHEF'S CHOICE ASIAN KNIFE SHARPENER

Scan for more information

The Chef'sChoice® Model 316 has two sharpening stages that sharpen the edge at 15 degrees. The first stage hones each side of the edge with fine 100% diamond abrasives. The second stage polishes the edge using ultra-fine 100% diamond abrasives. In both Stage 1 and 2, the left side and the right side of the blade are sharpened separately, which allows the user to hone and polish the traditional single-beveled Japanese blades. The contemporary Japanese blade, Chinese cleavers and modern European style knives should be honed and polished on both sides of the blade. The traditional single-bevel Japanese blade must be honed and polished primarily on the front side of the blade, which has the large factory bevel.

Using high precision elastomeric angle guides, the Model 316 will eliminate all the guesswork and provide users with a reliable sharpening method that guarantees a factory quality edge in just minutes.

BONZER® PORTIONERS

LITEGRIP & UNIGRIP

BONZER®

Availability in 15 different sizes (17 Unigrips). Where the two ranges differ is in the handle. The Litegrip has lightweight balanced handle, featuring an ergonomic squeeze operation, and the Unigrip handle is constructed for either thumb or squeeze operation, which makes both products some of the most easy to use on the market. The portioners are extremely hygienic, as there are no areas in which food can become trapped, whilst no springs eradicate the danger of them breaking and falling into the food.

- ✓ Litegrip 15 sizes / Unigrip 17 sizes
- ✓ No food traps
- ✓ NSF certified
- ✓ UK made
- ✓ Colour coded for quick reference
- ✓ Dishwasher safe
- ✓ Solid construction
- ✓ Low heat transfer to plastic handle

BONZER® LITEGRIP PORTIONERS

A lightweight and ergonomically designed portioner, featuring a food grade stainless steel bowl with an advanced scraper mechanism for quick and easy food release. Constructed for thumb or hand squeeze operation enabling smooth and controlled portioning, that is suited to substances such as mayonnaise, guacamole and sandwich fillings.

PORTION FOR PROFIT

There is a balance between customer perception of value for money and portion size. Get this right and you will keep customers happy and save money while reducing the amount of food wastage.

A staggering £2.5bn worth of food is wasted every year in the UK, which could rise to £3bn in 2017 unless preventative measures are put in place.

75% of all food waste is avoidable and could have been eaten with 34% of this waste being cleared from consumer's plates, which would imply the portion sizes are too large.

When you consider the average annual cost per outlet is estimated to be £10,000 it makes commercial sense to address this issue.

Consistent over-portioning could cost your company £1000's per year. For example if you reduce your portion size from a size 16 (59ml) to a size 20 (53ml) you could potentially save £0.04 per portion (apple sauce used as the example), now that doesn't sound like a lot but spread it over a year and it could be a saving of £1500. That is only one product!!

BONZER® UNIGRIP PORTIONERS

A lightweight and ergonomically designed portioner, featuring a food grade stainless steel bowl with an advanced scraper mechanism for quick and easy food release. Constructed for thumb or hand squeeze operation enabling smooth and controlled portioning, that is suited to substances such as mayonnaise, guacamole and sandwich fillings.

CASE STUDY

“In the first year we saved over £100,000 in food costs alone. Not only that we also eradicated a large proportion of food wastage on site, which gave additional savings.”

“Not only have we saved money, we have also managed to make this a much slicker operation. I would encourage anyone to investigate the potential that introducing a portioner/weighing regime can bring to a location.”

*Geoff Moyle, Catering Manager,
Freeman Hospital*

ZEROLL® SCOOPS ORIGINAL & ZEROLON

Made from Aluminium for its heat transfer properties the Zeroll range is known as the innovator of the conductive fluid transfer handle. The range consists of six sizes 1oz to 4oz in two material styles, classic Zeroll in a highly polished finish and Zerolon in a non-stick coating for quicker release of frozen products such as ice cream.

- ✓ One piece construction
- ✓ Six sizes
- ✓ Two finishes
- ✓ Creates perfectly round roll each time
- ✓ Not dishwasher safe

ORIGINAL ZEROLL® ICE CREAM SCOOP

The name in Ice Cream since 1935, Zeroll® scoops are now considered to be a modern design classic. The Zeroll® scoop contains a super conductive fluid that transmits the warmth from the user's hand to facilitate scooping and release of even the hardest ice cream.

SCOOP TIPS

- ✓ Hold the scoop comfortably in either hand close to the bowl.
- ✓ Place the scoop 1cm into the ice cream along the outside edge of the container
- ✓ Start rolling the ice cream in a circular motion; avoid crushing it against the side of the carton.
- ✓ Relax and let the scoop do the work.
- ✓ When the bowl is full, turn the scoop and lift from carton.
- ✓ Touch the portion lightly against dish or cone for instant release.

ZEROLON ICE CREAM SCOOP

The non-stick version with an aluminium base is essential for hard water areas. The modern design classic Zeroll® scoop contains a super conductive fluid that transmits the warmth from the user's hand to facilitate scooping and release of even the hardest ice cream.

THERMOMETERS

DIGITAL / ANALOGUE / SPECIALIST

The majority of ETI thermometers are produced in the UK to a very high standard and all the instruments comply with the EC RoHS2 and REACH Directives. Designed for general and specialised measurement tasks where regular data is required. A wide range of instruments to satisfy all monitoring tasks in the kitchen.

- ✓ Advanced heat measuring technology
- ✓ Wide heat range
- ✓ Specific and multipurpose instruments
- ✓ Long battery life
- ✓ Quality assured

SUPERFAST THERMAPEN 4 THERMOMETER

Over 50% faster response than traditional probes, reaches temperature in just three seconds. Precise read-out of temperature over a range of -49.9°C to 299.9°C with a 0.1°C resolution. Features a 360° self-rotating display which is backlit. The motion sensing sleep mode automatically turns on and off when set down or picked up, maximising battery life. The casing is washable and includes 'Biomaster' additive that reduces bacterial growth. Powered by a single AAA batteries with a minimum life expectancy of 3000 hours. Other colours available on request.
