SOUND ADVICE

MODERN INNOVATIVE PRACTICAL

MIP

Aiming to be the best at everything we do, MIP offers intelligent, cutting-edge solutions that include products and services that are modern, innovative and practical.

Vision

To be recognised as the premier supplier of textile and related products, services and solutions to the international healthcare community.

Mission

To consistently help our customers meet or exceed their objectives by providing innovative, cost effective textiles and related products, services and solutions.

SLEEPKNIT BEDDING

An innovation in textile design and processing that is revolutionising healthcare bedding. SleepKnit is a knitted-fitted bedding system that uses a specially constructed four way stretch fabric, combined with a patented bottom sheet design, to produce great results for residents, staff and the laundry.

SleepKnit only requires one person to make the bed and never requires ironing, thus saving time and money.

SleepKnit remains crease free and helps to reduce shear and friction, thus improving resident comfort.

SleepKnit is latex free and contains no elastic.

SleepKnit polyester bedding is flame retardant to European Standard EN ISO 12952.

All of the SleepKnit products are designed to withstand thermal disinfection temperatures.

DUVET COVERS

SleepKnit duvet covers are soft and comfortable and finished with an envelope style closure.

SLEEPKNIT BEDDING

SMART SHEETS FR

MIP's patented Smart Sheet is a knitted sheet with multi-directional stretch which, unlike conventional woven sheets, means that this one sheet will fit the vast majority of healthcare mattresses, ranging from standard profiling beds to beds with dynamic airflow/pressure reduction mattresses. Within the UK, Smart Sheets are being used on over 85,000 healthcare beds.

	Product Code	Size	Description	Pack	Price
	SK7000/FR SK7000D/FR	Single bed Double bed	Smart Sheet FR Polyester Smart Sheet FR Polyester	1 20	
					

*Polyester/Cotton Smart Sheets are available in cream and white only.

TOP SHEETS FR

SleepKnit top sheets have two fitted corners at the base with extra fabric on the width to create the unique toe pleat, assisting in the prevention of pressure sores by increasing space for feet whilst giving excellent comfort and warmth. The two fitted corners of the sheet mean that the sheet can be used for both an open and a closed bed.

BED ACCESSORIES

MRSA RESISTANT BED RAIL PROTECTORS

Our durable, foam filled pair of bed rail protectors are designed to be fixed in place to protect residents. The simple wipe clean, fluid proof surface, with hook & loop fastenings ensures ease of attachment and maintenance. All of our bed rail protectors have been specifically designed for use on healthcare beds, including profiling beds. Flame Retardant to British Standard BS 7177.

	Product Code	Size	Description	Pack	Price
	135/W/PU	87 x 137 cm	Standard	1 Pair	
	136/W/PU	87 x 195 cm	Full Length	1 Pair	
					

MRSA RESISTANT FULL LENGTH MESH BED RAIL PROTECTORS

Full length bed rail protection specifically designed for use with rails that drop down and profiling beds. Foam filled with a simple wipe clean, fluid proof surface and zipper fastenings. Flame Retardant to British Standard BS 7177.

	Product Code	Size	Description	Pack	Price
	144/W/PU	87 x 195 cm	Two Bar Mesh	1 Pair	
					

BED ACCESSORIES

SIDE WEDGES WITH CONNECTING SHEET

Our high density foam filled pair of side wedges with a breathable connecting sheet are designed to prevent residents from falling out of beds with no rails. The side wedges are attached to the connecting sheet using a large hook and loop strip, which is then attached underneath the bed using durable straps and quick release clips. This ensures that these products stay secure whilst on the bed. The connecting sheet can be washed up to 95°C or simply wiped clean. Flame Retardant to British Standard BS 7177.

	Product Code	Size	Description	Pack	Price
	138/W/PU	20 x 90 cm	Side Wedges with Connecting Sheet	1 Pair	
	138/WEDGES	20 x 90 cm	Side Wedges	1 Pair	
	137/W/PU	90 x 90 cm	Connecting Sheet	1	
					

NB: The FR certificate uses code for the 139/W/PU not 138/W/PU, 138/WEDGES or 137/W/PU but these products are made with the same fabrics just simply a different size and therefore separate tests are not required.

FALL-OUT MATS

Our high density foam filled fall-out mats are designed for use with low level beds to ensure that patients do not injure themselves if they were to fall out of a bed with no rails. Made with a foldable, wipe clean breathable material the fall-out mat is very easy to store and maintain and comes complete with durable carry straps. Flame Retardant to British Standard BS 7177.

	Product Code	Size	Description	Pack	Price
	139/W/PU	60 x 190 x 7 cm	Fall-Out Mats	1	
					

HEEL PROTECTORS

MIP's fibre filled heels protectors are designed to fit around the entire foot in order to reduce the pressure on the heel area, and protect the ankles from coming in contact with each other. These protectors are manufactured in such a way to help patients with drop foot and malposition. The outer material is an inherently fire retardant with soft foam covered strapping to keep in place. One size fits all.

	301/HP	One size fits all	Heel Protectors	1	

NEW PRODUCTS

ULTRASLIDE® BOTTOM SHEET

MIP recognizes that manual repositioning exposes caregivers to increased risk of neck, shoulder, and back injuries. That's why we have developed the Swift® UltraSlide System, a cost-effective, low-friction repositioning system intended to allow caregivers to safely and easily perform handling tasks with little physical strain. Implementing the standard use of this repositioner will create a safer healthcare environment for caregivers, ensure the comfort and security of patients/residents, and assist in supporting no-lift policies. The UltraSlide® Bottom Sheet is designed using MIP's patented Smart Sheet design with a low-friction panel down the centre, to be used together with Swift. UltraSlide should be used when patients/residents have little or no mobility and require extensive or total assistance for repositioning in bed.

To ensure optimum results for repositioning a patient/resident we recommend using the UltraSlide® Bottom Sheet in conjunction with the Swift slider.

Product Code	Size	Description	Pack	Price
PTD-LS/S	Single Bed	Swift UltraSlide® Bottom Sheet	1

NEW PRODUCTS

TRANSTEX™ EVACUATION SHEET

The Transtex™ Evacuation sheet has been designed to remain underneath the mattress, ready for rapid evacuation of patients or residents. In an emergency, it wraps around the patient, cocooning them within the mattress, to form a protective sledge. Drag loops at head and foot are used to rapidly tow the patient from the building. There are two alternative securing methods available to retain the evacuation sheet under the mattress 1. Velcro straps that secure the sheet to the bed frame. 2. Elastic straps that loop around each end of the mattress. In the event of soiling the evacuation sheet can easily be removed for laundering.

FLUID PROOF BAGS

With reference to 5.86 of Decontamination of Linen for Health and Social Care: Management and Provision, the welded seams on our fluid proof bags helps the control of fluids and odours. Ideal for heavily soiled and infected linen, the bags ensure that care is taken to prevent linen or foul seepage escaping from laundry bags and contaminating other items or staff when transporting soiled linen. These bags are made in a neutral colour with a choice of Blue, Green, Red, or White toppers for ease of sorting.

LAUNDRY BAGS

SAFEKNOT BAGS

SafeKnot is a soiled linen collection bag that utilises a simple and durable web fastening. SafeKnot bags feature a maximum load line inscription to prevent overloading and improve manual handling procedures. SafeKnot bags have an elasticated opening, ensuring that they will fit the majority of soiled linen collection carts.

SAFENOT BAG FASTENING PROCEDURE

STEP 1

↓

Bring handle across top of bag and pass through loop(A) on opposite side.

STEP 2

↓

Grab hold of the second loop(B) and insert handle through it.

STEP 3

↓

Pull handle upward to securely fasten bag

LAUNDRY BAGS

SAFETEX BAGS

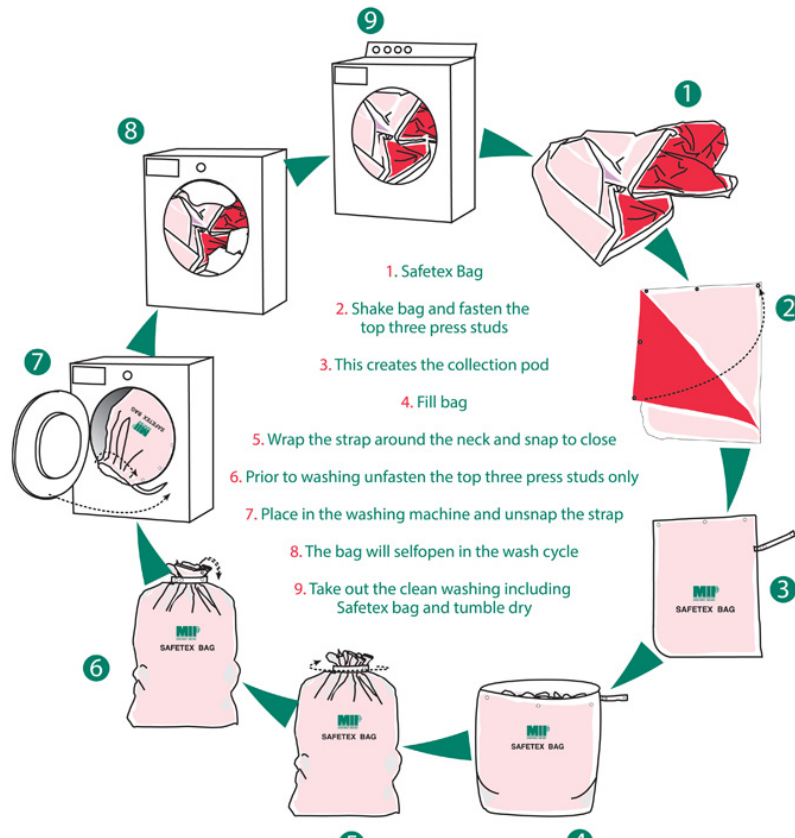

Safetex is a re-usable, self-opening laundry bag, designed for the collection of heavily soiled and infected linen. Safetex has unique welded seams to ensure the bag is totally fluid and odour proof. Once the Safetex bag is safely inside the washing machine the bag naturally opens. The natural opening minimises manipulation of the bag and prevents exposure of staff to the infectious linen prior to decontamination as per 5.31 of the Dept of Health CFPP, Decontamination of Linen for Health and Social Care: Management and Provision Document. Safetex bags are environmentally friendly and a cost-effective alternative to single use disposable red bags, with a lifespan that can withstand multiple processings. Available in Blue or Green (for delicate items that cannot withstand a boil wash) and Red (for infected linen).

OUR COMPANY'S ETHICS

OUR QUALITY POLICY

At MIP we strive to manufacture only the highest quality products and are proud that we have a name synonymous with quality in such a competitive industry. Any product that leaves our UK warehouse should be fit for purpose and as such we have worked hard to develop and maintain the quality policy for the UK.

We aim to provide defect free goods and services to its customers on time and within budget.

MIP operates a Quality Management System that has gained BS EN ISO 9001 : 2008 certification, including aspects specific to a provider of speciality textile and related materials handling products to the health care industry.

OUR ETHICAL POLICIES

ISO4001

MIP UK operates an Environmental Management System (EMS) that has gained ISO 14001 certification, which ensures that we have a full understanding of the internal and external environmental conditions specific to a provider of speciality textiles and related products to the healthcare industry.

LSAS Level 2 Accredited

Along with our own internal Corporate Social Responsibility Plan, MIP is now an accredited LSAS (Labour Standards Assurance System) Level 2 organisation.

By achieving LSAS Level 2, we have demonstrated processes and procedures to manage labour standards across our entire supply chain. By annually auditing all factories within our supply chain, MIP is ensuring that year on year our entire supply chain adheres to the highest criteria when it comes to Labour Standards. MIP UK is currently working towards LSAS Level 3.
