

## A Cost-Effective Solution For Every Labelling Need

Communicating allergens and nutritional information, managing prepped items, and reducing food waste depends on an efficient, accurate labelling system.

So, is your current system up to the challenge? Or does it lead to inconsistency, wasted food, and the need for retraining?

If so, it's time for the **DateCodeGenie® Lite**—a portable solution that automates your labelling process for both front and back of house operations, especially for kitchens with limited space.

## The DateCodeGenie® Lite Helps You:

### Create Consistency

Use a cloud-based system to create labelling consistency over several locations

### Minimise Food Waste

Manage prep inventory to reduce food waste & uphold health regulations

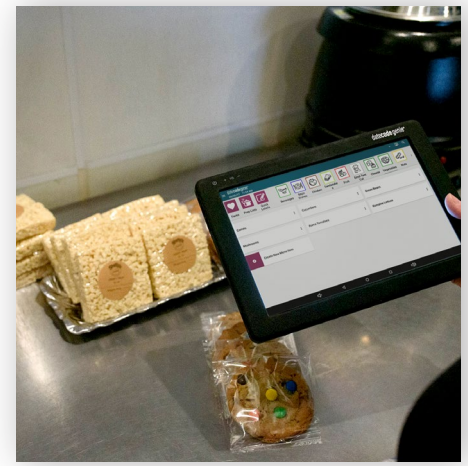

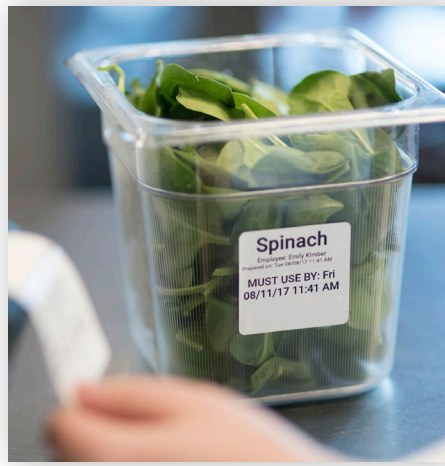

### Raise Allergen Awareness

Notify customers of allergens, dietary facts, & nutritional information

### Elevate Your Brand

Generate branded labels for delivery orders & retail items

## DateCodeGenie Lite Features Include:

- Portable 10" full-colour touch screen tablet with a reinforced, protective silicon case
- Wireless thermal printer & tablet connect using Bluetooth technology
- Stand-alone thermal printer with print head width of 50mm & 75mm, offering various label lengths to suit all applications
- Capable of printing a variety of information, including QR codes, allergens, ingredients, use by date, price, & logos
- Drag & drop label designer that makes label creation quick & easy
- A familiar, intuitive, & customisable user experience
- Ability to control menu items across multiple locations using the online DateCodeGenie portal
- Templates that help you create common label types even faster
- Media library for storing recipes, training documents, & videos
- WiFi connection that allows for automatic software updates
- Cloud-based technology for secure data storage & backup
- Training & support to help you fully utilise the device
- Two-year warranty
